

ABIKRISHNA T

UI/UX Designer | Chennai, TN

abikrishna15@gmail.com | +91 8056003838 | [abikrishna.vercel.app](#) | Behance

PROFILE SUMMARY

UI/UX Designer with 5+ years designing responsive web and mobile interfaces and original graphic design assets (illustrations, icons, brand collateral) for enterprise and consumer products. Strong grounding in core UX methodology - user research, usability testing, journey mapping, wireframing, and iterative validation - used to simplify complex, multi-step workflows into intuitive, high-completion user journeys. Track record of taking a struggling flow (high drop-off, low completion) through competitor analysis, usability testing, and stakeholder feedback to a measurably better outcome. Built and governed an enterprise design system - component library, style guide, and responsive grids - that reduced development time by 40% across four products. Comfortable presenting design rationale to cross-functional and client-facing stakeholders, backed by Google, IBM, and Figma UX certifications.

RELEVANT SKILLS

- UX Process: Research & interviews, personas, task analysis, sitemaps, information architecture (IA), user journey mapping, wireframing, high-fidelity mockups, interaction design, usability testing, iterative customer validation, competitor analysis, WCAG accessibility
- Design Systems & Governance: Component libraries, style guides, responsive grids, pattern libraries, developer handoff documentation
- Cross-Platform & Mobile: Responsive web and iOS/Android mobile design, B2B and B2C experience design, enterprise applications
- Research & Analytics: Google Analytics, usability testing, iterative customer validation, competitor and market analysis
- Collaboration: Daily Agile sprints with developers, PMs, backend engineers, and QA; client-facing design rationale and stakeholder presentations
- Design Tools: Figma, FigJam, Miro, Adobe XD, Adobe Illustrator, Adobe Photoshop, CorelDraw, Canva
- AI-Assisted Design: Figma Make, Lovable, Google Stitch
- Technical: HTML, CSS, Basic JavaScript, working knowledge of Flutter collaboration

WORK EXPERIENCE

UI/UX and Graphic Designer | Honey Universal Digital Pvt Ltd

Feb 2024 – Present

Haniao - Real-Time Interpretation & Multilingual Communication Platform (iOS, Android, Web)

- Booking flow required 7 steps and caused drop-off; ran usability testing and gathered stakeholder feedback to redesign the guided journey, cutting it to 4 steps and increasing completion
- Interpreter onboarding had high abandonment; ran competitor analysis and iterative customer validation to redesign onboarding, increasing sign-up completion by 32% and reducing drop-off by 28%
- Designed the nearby-interpreter search experience - filters, autocomplete, and empty-results handling - to help users quickly find an available interpreter
- Designed real-time, cloud-connected mobile experiences (iOS/Android) requiring live multilingual data sync, plus the in-progress web application extending the same experience to desktop

AI Document Processing Platform - Multi-Model AI Document Generation

- Designed the conversational, model-selection interface for an AI assistant tool - letting users choose between Claude, GPT, and Gemini to convert uploaded PDFs/images into formatted documents
- Built the full assistant flow - upload, AI model selection, output preview, confidence/quality scoring, and export - translating multi-model AI behavior into a simple, trustworthy interface for non-technical users

Design System & Cross-Functional Work (across four products)

- Design inconsistency across products was slowing delivery; built and maintained a shared design system - component library, style guide, and responsive grids - reducing development time by 40%
- Worked daily inside Agile sprints with Flutter developers, PMs, backend engineers, and QA across the full product lifecycle; maintained pixel-perfect handoff documentation against the shared style guide

- Applied WCAG accessibility and responsive design principles across all products; validated through iterative usability testing rounds
- Created original graphic design assets - logos, icons, illustrations, brochures, and marketing collateral - for product and client-facing materials at Honey Universal and Hanioo, including layouts adapted for multiple languages
- Used Google Analytics on web platforms (Hanioo) to inform iterative UX decisions

eCommerce & Purchase Flow Design

- Designed the end-to-end purchase journey for a translation-industry ecommerce site where users upload documents and purchase translation services - covering discovery, upload, service selection, and checkout
- Designed Sreesivam, an ecommerce site for traditional products (e.g., brass pooja items), covering product catalog navigation and discovery through to purchase

Translation Industry ERP Platform (built on Frappe/ERPNext)

- Supported migration of workflows into a shared ERP platform tailored to translation-industry data collection, vendor coordination, and invoicing - partnering closely with engineering on feasibility

AI-Powered Video Editing Trainer / FITA Academy (Weekend)

Ongoing

- Teach weekend short courses on AI video generation/editing tools and UI/UX design fundamentals, translating complex AI-native workflows into clear, teachable content for learners of varying technical backgrounds

UI/UX and Graphic Designer / G-Force Category Solutions

Jan 2022 – Dec 2023

- Designed responsive websites, landing pages, and digital interfaces for FMCG and retail clients, from brief through developer handoff
- Ran competitor and market analysis to inform UX decisions, improving engagement and conversion across client campaigns
- Collaborated with business teams, developers, and stakeholders to deliver user-focused design solutions
- Conducted market and competitor analysis to improve design effectiveness and customer experience

Trainee Programmer (UI Focus) / Congruent Solution Pvt Ltd

May 2021 – Nov 2021

- Built responsive UI layouts for a pension management platform using HTML, CSS, and JavaScript, improving task efficiency by 30%
- Delivered consistently within Agile sprints; received Outstanding Sprint Performer award

PERSONAL PROJECT

FLUBN - Product Designer / Independent SaaS (in development)

- Brands and creators lacked a single trusted platform to discover, negotiate, and manage collaborations end-to-end; independently designing and building FLUBN, a two-sided B2B/B2C creator booking marketplace
- Designed creator discovery, portfolio management, campaign creation (individual/bulk invites, public postings), guided booking journeys, real-time in-platform chat, contracts, secure payments (Razorpay), and performance analytics
- Pitched and executed original product ideas solo - from concept and IA through UI and technical planning - outside a structured team environment

EDUCATION

- Master of Computer Applications (MCA), University of Madras (IDE) - 2021–2023 | 77%
- B.Sc. Computer Science, Ramakrishna Mission Vivekananda College - 2018–2021 | 84%

CERTIFICATIONS

- UX Design Professional Certificate - Google
- Enterprise Design Thinking - IBM
- User Interface Design with Figma - Alison
- Digital Skills: User Experience - Accenture
- AI and ML - RUSA 2.0
